Portfolio

I'm a frontend developer who has a results-focused attitude to creating **SPA**, **using React(JS/TS)**, **Redux**.
Now I am improving my skills in this direction and expanding them with new technologies. My next goals are AWS, Node.js. So I strive to expand my competence and become a Full-Stack developer eventually.
Also have an interest in boosting my English.
I would like to find **remote** employment in a company with a modern approach to development and a collaborative team.
Open for your suggestions.

REACT · REDUX · TYPESCRIPT · REDUX TOOLKIT · REST API · AXIOS · JEST

TDD · REDUX-THUNK · STORYBOOK · MATERIAL UI · FORMIK · GITHUB · JAVASCRIPT
